APMG-INTERNATIONAL AGILEPM®

Practitioner

Unlocking Agility for Professionals in Project-Focused Roles

The Agile Project Management (AgilePM) certification aims to address the professional development needs of those working in a project-focused environment who want to be agile. Employees who can improve their work processes by applying agile practices are more valuable to employers. So if you're a scrum master, project manager, or team member who wants to stand out in a team environment, this training course is for you.

What is APMG?

The Practitioner level qualification aims to measure whether those who pass the examination have sufficient knowledge and understanding of the Agile Project Management guidance to be able to apply and tailor it to a given scenario situation.

Learning Objective

By the end of this course, you should be able to:

1. Apply DSDM philosophy and principles in projects
2. Configure agile project lifecycles for scenarios
3. Evaluate agile product content
4. Apply techniques: workshops, prioritization, iterative development, modeling, timeboxing
5. Identify suitable agile techniques
6. Understand roles and responsibilities, select personnel
7. Grasp agile project control mechanisms
8. Outline testing, estimating, and progress measurement in agile
9. Manage requirements, and rectify issues in agile projects
